OBJECTIVE

With a strong technical skill-set, and attention to detail, I want to work as a frontend web developer where I could create digital magic and elevate user experience to the next level.

SKILLS

Front-End: HTML, CSS, JavaScript ,TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Daisy-UI, Material-UI , ES6, Figma to HTML,XD to HTML, PSD to HTML.

Back-End: Node.js, Express.js, JWT

Database: MongoDB.

Tools : Browser Dev Tools, React Dev Tools

Other Skills: Git, GitHub, Firebase, Netlify, Vercel , Surge, Excel.

PROJECTS

House-Swift(Team-project) :   **Live** | **client-side- code** | **serverside-code**

We're building a hassle-free house rental platform that prioritizes user satisfaction, trust, and community.

Technology: React.js, TypeScript, Node.js, Express.js, .Mondgodb, Firebase.

Key Features:

- Payment Processing Make payments using the local Bangladesh gateway, SSLCommerz.
- Receive web push notifications using Firebase cloud messaging when the user visits the web and then ask the browser to request permission for notification.
- Search recommendation Get personalized search recommendations.
- Use multiple filtering options to find the perfect place to search.

Task-management-system: **Live** | **client-side- code** | **serverside-code**

Supercharge your productivity with the Task Management System Effortlessly manage tasks, prioritize deadlines, and achieve more Experience a smarter way to work.

Technology: React.js, JavaScript, Node.js, Express.js, .Mondgodb, Firebase, React DND.

Key Features:

- User Authentication using Firebase Authentication to allow users to sign in to your app using one or more sign-in methods, including email address and password, google singin.
- Drag and Drop functionality using react DND for this functionality.
- Manage Task A user can manage his/her task when the user can create a task.

Blood Donation Application: **Live** | **client-side- code** | **serverside-code**

Developed a user-friendly platform to streamline blood donation activities, connecting donors with individuals in need of blood.

Technology: React.js, JavaScript, Node.js, Express.js, .Mondgodb, Firebase.

Key Features:

- Admin Panel for managing all donation requests admin can do anything.
- Integrate country all districts and upazila in the registration page for simplicity.
- Image upload functionality using imageBB on the user registration page.
